Flexibility: We have 401(k) administrative solutions for all of your clients’ needs, regardless of how they administer their payroll.
Investment Flexibility and Control

Paychex provides a wide range of investment choices for every type of company to help you and your clients match objectives. Paychex is not an investment manager and has no proprietary investment requirements.

You will enjoy:

- Thousands of options from leading investment companies
- Open architecture or pre-selected investment menus
- Flexibility to add or remove investments at any time
- Multiple advisor payout options
- A robust platform offering a full, open architecture of investment choices including mutual funds, collective investment trusts (CITs), and target date funds (TDFs)
- Optional fiduciary solutions for 3(21) and 3(38) services

The value of the investment options will vary with market conditions and, upon distribution from the retirement plan, may be worth more or less than the original value. A plan of systematic savings does not ensure a profit or prevent a loss in declining markets.

Part of the ERISA section 404(c) requirement states that a plan should offer participants a broad range of investment alternatives, requiring at least three diversified-investment alternatives, each of which has materially different risk and return characteristics.

For more complete information on investment options, please consult prospectuses and other comparable documents. Investors should carefully consider the investment objectives, risks, charges, and expenses before investing. This, and additional information about investment options, can be found in the prospectuses on each investment company’s website. Please read these documents carefully before investing.

Strengthening Plan Health

The Plan Health Score™ is a measurement of overall plan health that benchmarks key metrics that are foundational to participants’ retirement readiness. The Plan Health Score can be aligned with overall goals enabling advisors and plan sponsors to focus on detractors to plan health and setting actionable goals for specific metrics.
